

Housing Associations: Bolton at Home

Bolton at Home

The Challenge

Bolton at Home is committed to investigating and resolving cases of anti-social behaviour which cause distress to residents of their estates.

A resident living in sheltered accommodation was repeatedly allowing youths to enter the property. These youths were causing problems and distress

for other residents, leaving them intimidated and feeling threatened. The same youths also caused damage to a communal area.

Bolton at Home's main objective was to get enough evidence to support an application for possession and protect other residents.

Housing Associations: Bolton at Home

The Solution

An overt lamp-post Dome camera was fixed outside of the residential area, and a covert camera was placed at a resident's property to survey the communal area.

With the help of residents providing dates and times of incidents, Bolton at Home staff cross-referenced images collected from the cameras and provided evidence to the police and courts.

The WCCTV Dome on the lamp-post provided them with complete flexibility and portability. The system is ideal for rapid installation.

The 3G Compact Unit is a discreet unit which can be set up in any environment for remote security purposes. The unit has an integrated hard disk for digital recording.

The Result

Bolton at Home's ASB Team combined evidence provided by residents with images downloaded from the WCCTV cameras to support its application for possession of the property.

Data from the cameras is shared within Bolton's BSAFE partnership, and is used to produce ASB and Crime stats for the Borough of Bolton at monthly partnership meetings.

ASB Team Manager, said "WCCTV equipment is vital to deter crime, and bring peace to our communities."

The WCCTV 3G Compact

The WCCTV compact is a 4 channel DVR unit that can be utilised in any CCTV environment. The system has an integrated removable hard disk for local digital recording, giving users the option to view either live images or evidential quality recorded video footage from any remote location. The system will operate with fixed, PTZ, analogue or IP cameras.

The WCCTV Compact features 4 quick-fit RJ45 connections for video, alarm, telemetry power & GPS. The system is future proofed and designed to operate on all latest generation mobile phone networks.

Features & Benefits of the WCCTV Compact

- Mobile, flexible
- 4 camera system
- Remote access to live video
- Remote access to evidential, removable, digital recording
- Rapid installation and easy re-deployable
- Multiple transmission options - HSUPA, HSDPA, UMTS, GPRS and broadband
- Integrates with other systems
- External housing
