- No requirement for additional installation or maintenance
- Standalone service or as an add on to your complete site security package
- Full licensed drone filming
- Solar options available

WCCTV is a specialist provider of fully-managed Time Lapse Video Cameras, including filming and production services, for construction and demolition projects.

Our team of installation engineers and video editing professionals will create a time lapse video that brings your projects to life in stunning high-definition up to 4K.

If you're looking for a proven method of generating publicity, engagement and new business, a Time Lapse Video is what you need. Videos we've produced have been featured on the BBC, ITV, national newspaper websites, and multiple leading industry websites.

Our time lapse cameras can be integrated into a WCCTV HD Site Tower as part of WCCTV's managed site security services, or as a standalone solution.

Throughout your project, you will have access to WCCTV's time lapse portal, where you can review images and footage, download progress videos and even embed the live stream into your websites.

We can provide time lapse video cameras that do not require any additional onsite infrastructure, installation work, power sources or connectivity - meaning we can capture video where others can't.
