RAPID DEPLOYMENT CCTV TOWERS

WCCTV is the UK's leading provider of rapid deployment CCTV Towers with 1,200 + active systems nationwide.

These 7m tall, bright yellow security solutions provide a highly visible deterrent that helps prevent crimes before they happen. They also feature integrated wireless transmission (4G, 3G, Wi-Fi) technology, an HD IR PTZ camera, audio speakers to enable a remote challenge, PIR motion detectors and a 4TB HDD for local recording of video evidence.

As truly rapid-deployment systems, a WCCTV Tower can be installed and fully-operational in a matter of minutes, and can easily be moved around a site as works progress. There is no requirement for ground or civil works.

When backed by our NSI gold alarm monitoring services, a WCCTV Tower effectively eliminates the need for man guarding, helping to reduce security costs by up to 86% without compromising on quality or reliability.

In addition to providing site security, WCCTV Towers can also be used for remote project management and health and safety applications. Project teams can access cameras anytime to review footage and solve on-site problems and/or check regulations are being followed by personnel and sub-contractors.

WCCTV prides itself on providing an in-house manufactured CCTV solution, back by a world-class managed service which starts at site survey, right through to installation, maintenance, alarm response and monthly reporting, detailing on-site events and speed of action from the WCCTV team.
