WCCTV 4G COVERT DOME

The WCCTV Covert Mini Dome is a redeployable CCTV system designed to discreetly blend into its environment and deliver live and recorded video via 4G connectivity.

As an all-in-one rapid deployment surveillance solution, the Covert Mini Dome combines an HD PTZ camera, 4TB local recording capacity and 4G transmission technology into a covert housing designed to look like an electrical junction box.

The system is easy to install, easy to maintain, and moved to new locations to meet your changing requirements.

Live and recorded footage can be accessed via wireless networks including 4G, 3G and Wi-Fi connectivity, allowing users to remotely view and download the video via mobile devices (smartphone, tablet, laptop or PC) or existing video management systems.
