

WCCTV 4G HD SPEED DOME LITE

KEY PRODUCT BENEFITS

WCCTV 4G HD SPEED DOME LITE

WCCTV's 4G HD Speed Dome Lite is a lightweight Redeployable CCTV system that delivers live and recorded high definition images via 4G and mobile networks. As a truly all-in-one surveillance system, it combines a 3MP PTZ camera, local recording capacity (up to 4TB) and wireless transmission technology into a single, lightweight unit.

Due to its lightweight construct, it can be deployed onto any style of street lighting column without exceeding weight limits or windage specifications.

Live and recorded footage can be accessed via 4G, 3G and Wi-Fi connectivity, allowing users to remotely view and download the video via smartphone, tablet, laptop or PC or via integration to a CCTV control room.

Inbuilt video analytics provide visual verification and email alarms for a range of intelligent surveillance applications, and three additional input channels allow for the addition of secondary cameras such as ANPR cameras, secondary PTZ cameras or static cameras.
