Our mission is to detect, deter and provide digital evidence of crimes by supplying the highest quality surveillance technology backed by a comprehensive service and connectivity package.

David Gilbertson, CEO

Protecting Your Demolition Site Security with WCCTV's Surveillance Solutions

WCCTV is the UK's leading provider of demolition site security, specialising in temporary CCTV solutions. We supply mobile CCTV Towers backed by live monitoring to prevent theft and unauthorised access. Our fully managed service covers CCTV rental, installation, maintenance and rapid response, ensuring your site remains protected at all times.

Demolition sites are prime targets for theft, vandalism and trespassing. With valuable materials and heavy machinery often left unattended, these sites attract criminals looking to steal scrap metal and equipment. Reports estimate that metal theft alone costs the UK economy over £770 million annually.

WCCTV's mobile CCTV Towers and live monitoring services provide proactive protection, deterring crime before it happens and ensuring rapid response when needed. Protect your demolition site without the stress. Let WCCTV handle security while you focus on the job at hand.

Why choose WCCTV?

- **Market-leading** wireless CCTV solutions
- **Rental options** available
- **24/7/365** remote monitoring
- **Rapid Deployment & Nationwide Support**
- **Integrated AI analytics**
- **Cost effective** alternative to guarding
- **Solar & battery** powered options
- Integrated solutions for **full-site coverage**

At WCCTV, we leverage over 20 years of industry expertise, cutting-edge technology and a comprehensive range of wireless surveillance solutions to deliver a rapid and effective security response tailored to your construction site's needs.

Reduce Security Costs by up to

88%

Rapid Deployment CCTV Towers

Demolition sites face constant security threats. Unoccupied structures, exposed materials and high-value machinery create easy targets for theft, vandalism and trespassing.

WCCTV's rapid deployment CCTV Towers help to:

- Prevent theft, vandalism and trespassing
- Remotely monitor demolition progress
- Manage health and safety compliance

Managing security shouldn't take time away from your day-to-day activity, so WCCTV has developed a fully managed security service that includes:

- CCTV rental, installation and maintenance
- Remote video monitoring and rapid response services
- Technical support and remote system diagnostics
- Incident reporting and evidence packaging

Standing 6m tall, they serve as a powerful deterrent, warning intruders that your site is protected by live monitored CCTV. Whether you need temporary security during demolition or long-term site surveillance, WCCTV Towers provide reliable protection wherever you need it.

Our ultra-reliable managed security services can save up to **88%** when compared with the cost of traditional guarding services, without compromising results.

We back our CCTV systems with a **full service** that includes installation, maintenance, alarm monitoring, connectivity, support and ongoing reporting.

With our camera **rental options**, you only need to pay for security when needed. No need to worry about transporting the Towers from job-to-job: we'll deliver and take it away.

At **6m tall and bright yellow**, our CCTV Towers are an unmistakable presence on your sites - warning intruders that your site is under our watchful eye.

Rapid Deployment CCTV Towers

We offer a range of Rapid Deployment CCTV Towers:

➤ Eco Tower

The Rapid Deployment CCTV Eco Tower is designed to provide security at locations like construction sites and critical infrastructure facilities that require live video monitoring where generator power is available.

➤ Solar Fuel Cell Tower

Solar Powered CCTV Towers are specifically designed to provide security at construction sites, Critical National Infrastructure facilities or off-grid sites without power or internet facilities. They operate autonomously, ensuring complete protection 24 hours a day.

➤ Thermal Solar Tower

Thermal Solar CCTV Towers provide complete site security at transient sites, compounds and off-grid sites without power or internet facilities. They operate autonomously, ensuring protection 24 hours a day.

➤ Smart Tower

Our Smart CCTV Towers utilise AI-driven video analytics software to automatically detect activities such as trespass or loitering, immediately triggering a crime prevention response.

Managed Services

WCCTV can provide a fully managed security service for your property.

Solar Power

Our fully power autonomous systems can be deployed in virtually any location.

Rental Options

Only pay for the security you need, when you need it.

Visual Deterrent

Any potential intruders are immediately aware.

Remote Video Monitoring

Our Remote CCTV Monitoring service allows security cameras to be closely monitored by a team of professionals who can issue real-time audio alerts and dispatch police where necessary, ensuring your premises and assets are completely protected when you're not there.

WCCTV's cameras contain automatic detection capability, so any intrusions are immediately flagged to our monitoring team. This initiates a remote crime prevention process, which includes live audio challenges and the despatching of police or security personnel to protect your property and assets.

The security cameras video stream is sent directly to an Alarm Receiving Centre (ARC) or monitoring station. A team of security professionals will receive an alarm from your site and immediately review the footage to verify the alarm then take appropriate action.

Monitored Rapid Deployment CCTV is a cost-effective security solution, cutting costs by 88% while ensuring 24/7 protection. It enables rapid police response, reduces false alarms, and provides detailed incident reports.

Our partner monitoring station provides a detailed report of **any incidents** taken place at your locations and give details on what action was taken - including speed of action.

Cheaper doesn't mean less effective. Our monitored CCTV systems are **always alert, always on guard** and can spot criminals even in complete darkness.

If an intrusion is detected at your site, a remote CCTV operator can activate the inbuilt blue lights, siren and voice-down systems on a Site Tower, acting as a **proven deterrent**.

Our partner monitoring station is an **NSI Gold Approved** UK-based Alarm Receiving Centre (ARC), operating sites 24 hours a day, 365 days a year.

Time Lapse Video Solutions

WCCTV delivers high-quality Time Lapse Video solutions tailored to demolition projects, providing a dynamic way to document progress, enhance stakeholder engagement, and support project oversight. Our experienced team of engineers and video specialists collaborate closely with your project team to capture key milestones and deliver a visually compelling record of your infrastructure development.

A key advantage of WCCTV's Time Lapse solutions is the ability to access live footage remotely. Our intuitive mobile app and desktop platform enable real-time monitoring from any location, supporting informed decision-making and operational efficiency.

Recognising the demanding and dynamic nature of demolition projects, WCCTV's Time Lapse Cameras operate autonomously, requiring no external power or internet connectivity. This ensures seamless deployment across a variety of demolition sites, from urban developments to industrial clearances and large-scale dismantling projects. Let WCCTV help you document and showcase your project's progress and success.

WCCTV's specialist Time Lapse Video Cameras capture stunning images in ultra-high definition **up to 4k**, helping to bring your projects to life like nothing else.

Provides you with the ability to keep track of your projects through remote access at any time from anywhere with our **free** mobile app and desktop software.

Following completion of your project, we enhance the footage with **editing services** including adding music, animation, images, text overlays and more.

Time Lapse Videos are an **excellent way of marketing** your construction business through social media and engaging with key stakeholders to keep them engaged.

Site Condition Monitoring Solutions

Site condition monitoring is vital to ensuring your site, the local area and the environment are protected against the dangers created from demolition and construction.

Available with all of our security solutions, our site condition monitoring sensors track key data such as emissions, noise and weather conditions and will trigger alerts if levels are above the predefined rule set by yourself.

Implementing a site condition monitoring sensor is simple, especially with WCCTV. They can be attached to our products and offer measurements for:

- Weather conditions
- Decibel levels
- Particle monitoring
- Local Air Quality Management (LAQM)
- Co2 emissions

Their use helps to keep you within safety levels, prevent complaints, and avoid costly fines and work stoppages which can disrupt your demolition sites' operations.

With our site condition monitoring, you're able to preset limits to ensure you stay within the safety range specified for your site, protecting the public and environment.

If preset limits are surpassed, our sensors will trigger, promptly informing you of this, so that you can react quickly to resolve the matter and avoid potential fines.

Our IoT sensors help to monitor and track weather conditions, providing you with evidence that can be presented to clients if delays are faced due to this.

Site condition monitoring allows you to maintain positive community relationships, prevent financial penalties, and help keep your demolition site on schedule.

Additional Security Solutions

Security Solution	Description
 ANPR Cameras	Tracks and records vehicle movements, preventing unauthorised access to demolition sites and infrastructure projects.
 Thermal Imaging Cameras	Detects heat signatures for intrusion detection in low-light conditions or fire prevention on demolition sites.
 AI-Driven Video Analytics	Intelligent surveillance that reduces false alarms, detects unauthorised access and enhances security response times through automated alerts.
 Protect Bodycam Solutions	Wearable security solutions to ensure the safety of remote and isolated workers, with real-time monitoring and emergency alerts.
 Evidence Management Software	Our Evidence Management Software (EMS) is designed to provide users with a simple solution for managing digital files captured by a WCCTV Body Worn Camera.
 Software Solutions	Our software allows you to add cameras, control them, create automated tours, receive alerts and view live and recorded footage at any time, anywhere.
 Stellifii Monitoring & Data Platform	Stellifii is a UK Manufactured 5G-ready platform that combines video streaming with smart city applications in a cloud-based ecosystem.
