Our mission is to detect, deter and provide digital evidence of crimes by supplying the highest quality surveillance technology backed by a comprehensive service and connectivity package.

David Gilbertson, CEO

Helping Local Authorities Improve Public Safety, Reduce ASB and Manage Traffic

WCCTV is the UK's leading provider of redeployable CCTV and Body Worn Cameras to the UK's Local Authorities. Since 2001, we have led the market in terms of the number of systems active nationwide, technological developments and a commitment to outstanding customer support.

Redeployable CCTV is ideal for temporary or targeted surveillance and crime reduction applications. Councils can use cameras to target specific hot-spot areas with the flexibility to move them to new locations if requirements change.

Our market-leading cameras can be used to assist with issues such as:

- Anti-social behaviour
- Community safety
- Traffic management
- Temporary events security

Why choose WCCTV?

- **Market-leading** wireless CCTV solutions
- **Rental options** available
- **24/7/365** remote monitoring
- **Rapid Deployment & Nationwide Support**
- **Integrated AI analytics**
- **Cost effective** alternative to guarding
- **Solar & battery** powered options
- **Integrated solutions for full-site coverage**

At WCCTV, we leverage over 20 years of industry expertise, cutting-edge technology and a comprehensive range of wireless surveillance solutions to deliver a rapid and effective security response tailored to your construction site's needs.

Reduce Crime
& ASB by
60%

Redeployable CCTV Cameras

WCCTV's Redeployable CCTV Cameras provide an ideal security solution for local authorities, offering flexible, high-performance surveillance without the need for fixed infrastructure. These portable, all-in-one units feature a high-definition PTZ (Pan-Tilt-Zoom) camera, wireless video transmission, onboard storage and AI-powered analytics.

One of the key benefits of our Redeployable Cameras is their flexibility to be relocated based on changing local priorities and emerging security concerns. Unlike fixed CCTV systems, these cameras can be easily moved to different areas, ensuring ongoing surveillance where it's needed most. They provide 24/7 monitoring to help deter and detect issues such as anti-social behaviour, fly-tipping, vandalism, and unauthorised access.

The wireless connectivity of WCCTV's Redeployable Cameras allows local authorities to remotely access live and recorded footage via WCCTV's secure platform or mobile app. This enables officers and enforcement teams to monitor key areas in real time from any location.

Our Redeployable Cameras can be installed and operated in **under 20 minutes**, providing a dynamic response to emerging and developing crime patterns.

WCCTV's unique **mobile transmission technology** allows you to access footage from your cameras via our desktop software and smartphone app anytime, anywhere.

All of our redeployable units feature **three** additional input channels, allowing for bolt-on solutions such as **ANPR** cameras and blue light alarms to be added.

With our cameras we provide a built-in remote diagnostics tool, **WCCTV Heartbeat**, which continually checks the camera is performing to optimal levels.

Redeployable CCTV Cameras

We offer a range of Redeployable CCTV Cameras:

➔ 4G IR Speed Dome+ CCTV Camera

WCCTV's 4G IR Speed Dome + is a market-leading redeployable CCTV camera specifically designed to deliver live and recorded high-definition video using 4G/5G transmission technology.

➔ 4G IR Mini Dome CCTV Camera

WCCTV's 4G IR Mini Dome is a redeployable CCTV camera designed to deliver live and recorded high-definition video utilising the latest mobile transmission technology. Live and recorded footage can be accessed remotely via a smartphone, tablet, laptop or from a CCTV control room.

➔ 4G MultiCam CCTV Dome Camera

The WCCTV 4G MultiCam Dome is a Redeployable CCTV camera that provides video streams from four different directions utilising 4G transmission. All live and recorded images can be accessed remotely via 4G mobile technology.

➔ WCCTV Help Point

WCCTV's revolutionary Help Point system provides people in distress with instant access to police and council CCTV control rooms when they urgently need help.

Rapid Deployment

Cameras can be installed and operated in under 20 minutes.

Remote Diagnostics

WCCTV Heartbeat continually checks that the camera is performing to optimal levels.

Bespoke Solutions

The three additional input channels allow for bolt-on solutions such as ANPR.

Integration Options

Integrates into every major control room video management software (VMS).

Rapid Deployment CCTV Towers

Securing public areas requires continuous, proactive surveillance to prevent trespassing, vandalism, and unauthorised access. WCCTV's Rapid Deployment CCTV Towers act as a highly visible deterrent, offering 360-degree HD surveillance, AI-powered analytics, and 24/7 remote monitoring, ensuring swift response to any security threats or crimes.

WCCTV's Rapid Deployment CCTV Towers provide immediate, high-quality surveillance coverage in virtually any environment. Our distinctive bright yellow Towers stand 6m tall, sending an immediate visual warning to potential criminals that your property is protected by a high-tech CCTV system.

Deploying a CCTV Tower requires no complex setup - you can have full security coverage in minutes. Our HD cameras are equipped with infrared capability to ensure crystal-clear imagery, day or night.

With multiple powering options and wireless video transmission technology, you have complete flexibility over where you deploy a WCCTV Tower. There's no need for power or internet facilities at your location.

Our ultra-reliable managed security services can save up to **88%** when compared with the cost of traditional guarding services, without compromising results.

We back our CCTV systems with a **full service** that includes installation, maintenance, alarm monitoring, connectivity, support and ongoing reporting.

With our camera **rental options**, you only need to pay for security when needed. No need to worry about transporting the Towers from job-to-job: we'll deliver and take it away.

At **6m tall and bright yellow**, our CCTV Towers are an unmistakable presence on your sites - warning intruders that your site is under our watchful eye.

Body Worn Cameras

WCCTV is an award-winning supplier of UK Manufactured Body Worn Cameras that feature a unique forward-facing screen that has a proven impact on reducing the occurrences of verbal and physical abuse directed towards public-facing workers.

We provide a complete solution for Body Worn Video applications, including award-winning Body Cameras, digital evidence management software and range of mounting and charging accessories. We manufacture and support all of our cameras and software in the UK, allowing us to provide an end-to-end managed service that helps our clients protect their staff and secure vital video evidence.

Our Body Camera leads the market in terms of features, functionality, technical capability and ease of use for the wearer and video manager. The simple and functional design of the camera makes it easy to use, with one button to start recording and one button to stop recording. A configurable pre-event recording buffer of up to 120 seconds ensures that vital incidents are not missed.

The distinctive forward-facing screen on WCCTV's body cameras plays a significant role in **de-escalating conflict**. Individuals behave better when recorded.

Small, discreet and lightweight, WCCTV's body cameras are **barely noticeable** to the wearer once they are attached. Despite the size, it contains market leading features.

The device's **1080p video recording** capability means you will capture high-quality video evidence, whether for police investigations or training employees.

The optional extended battery pack easily clips onto the bottom of the Body Camera, providing an additional **8 hours of run time**, making it ideal for long periods.

Anti Social Behaviour

Redeployable CCTV Systems can play a huge part in preventing crime (and reducing the fear of crime) within local communities, with ECCTV's cameras shown to reduce ASB by up to 60%.

They offer the benefit of providing temporary surveillance and reassurance in areas where residents' safety is of concern whilst gathering critical video evidence.

Fly-Tipping

Redeployable CCTV allows for the direct targeting of areas associated with fly-tipping, gathering vital evidence for investigation and prosecution whilst acting as a visual deterrent.

Once the issues in an area have been resolved, the cameras can easily be relocated to address surveillance needs at other locations affected by fly-tipping.

Traffic Management

Redeployable CCTV assists with Urban Traffic Control, congestion monitoring, workforce protection and investigating traffic violations.

Their portability means they can be deployed for short-term applications such as monitoring road works, informing decision-making on traffic flow and temporary event management.

Additional Security Solutions

Security Solution	Description
 ANPR Cameras	Tracks and records vehicle movements, preventing unauthorised access to construction sites and infrastructure projects.
 Thermal Imaging Cameras	Detects heat signatures for intrusion detection in low-light conditions or fire prevention on construction sites.
 AI-Driven Video Analytics	Intelligent surveillance that reduces false alarms, detects unauthorised access and enhances security response times through automated alerts.
 Protect Bodycam Solutions	Wearable security solutions to ensure the safety of remote and isolated workers, with real-time monitoring and emergency alerts.
 Evidence Management Software	Our Evidence Management Software (EMS) is designed to provide users with a simple solution for managing digital files captured by a WCCTV Body Worn Camera.
 Software Solutions	Our software allows you to add cameras, control them, create automated tours, receive alerts and view live and recorded footage at any time, anywhere.
 Stellifii Monitoring & Data Platform	Stellifii is a UK Manufactured 5G-ready platform that combines video streaming with smart city applications in a cloud-based ecosystem.
