Telecommunications Security

CCTV and Security for Telecoms Infrastructure

Protecting the UK's Telecoms Network

Keeping the UK's telecommunications network secure requires specialist security solutions. Unmanned sites, remote locations and valuable infrastructure make telecom assets prime targets for trespass, theft and vandalism.

Wireless CCTV provides rapid deployment surveillance solutions designed to protect cell towers, fibre-optic networks and switching hubs. Our CCTV Towers deliver an immediate security presence, deterring intruders and enabling real-time monitoring to prevent service disruptions.

With rental and purchase options, our systems allow you to scale security as needed, providing protection for both operational sites and new infrastructure projects.

Let us take care of security so you can focus on keeping the UK connected.

Why Telcoms Companies Choose WCCTV

Managed Service

Our CCTV Towers come with a fully managed service, covering installation, maintenance, alarm monitoring, connectivity, technical support and reporting. Whilst you focus on network operations, we'll take care of your security.

Rental Options

Whether you need to protect an operational site or secure a new installation, our innovative surveillance solutions adapt to your needs. With rental and purchase options, you get security when and where you need it.

Crime Deterrent

Standing 7m tall and painted bright yellow, our CCTV towers create a strong visual deterrent, warning potential intruders that your telecoms infrastructure is protected and actively monitored.

Remote Monitoring

Stay connected to your sites from anywhere with our free mobile app and desktop platform. View live and recorded footage, respond to incidents in real time or let our NSI Gold Accredited monitoring team to handle security for you.

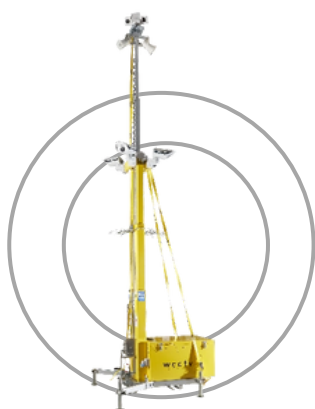

Reduce Costs

Our fully managed security service delivers proactive, around-the-clock protection at a fraction of the cost of traditional guarding. Combining video analytics, remote monitoring, and rapid response, it offers a smarter, more efficient form of security.

Proven Protection

As the UK's leading provider of CCTV solutions for telecoms sites, our systems meet the highest security standards, ensuring reliable protection for cell towers, fibre-optic networks and switching hubs.

Deployable CCTV for Telecommunication Sites

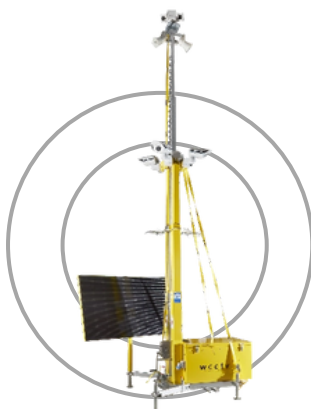

Eco Tower

The WCCTV Eco Tower is a battery-powered CCTV solution ideal for reducing fuel use, noise, and emissions on low-power sites.

CCTV Rental for Telecoms Infrastructure

No Upfront Costs – Just Reliable Security

Not every telecoms site requires a permanent security solution. Cell towers, fibre-optic networks and switching hubs - especially those in development, expansion or maintenance phases - often need temporary, adaptable security to deter theft, vandalism and trespass.

Purchasing CCTV systems involves initial upfront costs and residual costs related to maintenance and storage. Renting cameras from WCCTV eliminates these challenges, providing instant security without long-term commitments.

With rental options, you get CCTV Towers where and when needed, scaling coverage as your network expands or risks change. Prevent downtime, protect critical infrastructure and secure your telecoms assets with WCCTV's CCTV rental solutions.

Renting CCTV Works Best for Telecoms Security

Security Without the Long-Term Commitment

The UK's telecoms infrastructure is constantly expanding, with new cell towers and fibre networks being installed to meet ever increasing demand for services. Our rental options adapt and evolve with your projects, so you can quickly scale coverage up or down.

Renting eliminates the hassle of camera deployments and management. We handle delivery, installation, monitoring, maintenance, and collection.

- **No Upfront Costs:** Comprehensive security with no capital investment
- **Quick Deployment:** We deliver, install and maintain your system
- **Scalable Security:** Adjust your security as projects evolve
- **Latest Technology:** Access advanced surveillance kit without upgrade costs

Managed Security for Telcoms Infrastructure

Security That Works, Without the Hard Work

Securing cell towers, fibre networks and switching hubs shouldn't take time away from operations. WCCTV's fully managed service ensures your telecoms sites stay protected without adding to your workload.

We take care of everything - from site surveys and CCTV tower installation to live monitoring, mobile guard response, maintenance and ongoing support.

You'll also have full access to our mobile app and desktop platform, giving you real-time oversight and control over your site's security.

With nationwide coverage and rapid response, WCCTV delivers seamless, proactive security, ensuring your telecoms infrastructure stays secure.

Live Video Monitoring for Telecoms Sites

Your Virtual Security Team

Installing CCTV is a great visual deterrent that will help prevent crime, but why just record criminal events when you can stop them in real time?

With WCCTV's live video monitoring, and NSI Gold Accredited security team will actively oversee your telecoms infrastructure, detecting threats and triggering an immediate response before incidents can unfold.

Our CCTV Towers use infrared detection to establish a virtual perimeter around your site. If an intruder attempts to gain access, our monitoring team is alerted instantly, activating audio warnings and contacting authorities.

- 1 Live audio warnings** to challenge intruders before they act
- 2 Immediate escalation** to police or on-site security for a rapid response

Mobile Keyholding for Telecoms Sites

We Respond, So You Don't Have To

Unmanned telecoms sites are frequent targets for theft, vandalism and trespassing. If an alarm is triggered late at night, your team shouldn't have to respond.

Our Mobile Keyholding service ensures that a trained security presence is deployed to your site when it matters most, without you having to deal with phone calls in the dead of night.

If an intrusion is detected, security personnel are dispatched immediately to assess and manage the situation, securing the site and preventing further disruption. A detailed incident report ensures that you stay informed without the need for direct involvement.

With CCTV surveillance, live monitoring and mobile response, WCCTV provides a complete security solution, keeping your telecoms infrastructure protected at all times.

Why Choose WCCTV for Your Surveillance Solution

UK's Most Established CCTV Tower Supplier

WCCTV is the UK's original and most experienced supplier of rapid deployment CCTV towers.

We don't resell third-party equipment or bolt together off-the-shelf kits. Every tower is developed in-house by our own engineering team and supported by a service model built around the needs of real sites in the UK.

Our product range is the most complete on the market, with tower variants for every power setup, environment and deployment type. From construction sites and infrastructure projects to public space monitoring and vacant property protection, our systems are trusted by hundreds of organisations across the UK.

Whether you need one tower or a full network, Wireless CCTV gives you proven technology, complete control and full-service support from a single provider.
