Data Centres / Critical Build Sites Security

Security Solutions for High-Value Build Sites

Protecting Data Centre Construction Projects

Data centres have emerged as a key part of the UK's critical infrastructure sector, providing essential services to millions of businesses and individuals.

These sites require specialist security from day one. With high-value materials, expensive equipment and multiple contractors on-site, these projects are prime targets for theft, trespass and vandalism.

WCCTV provides rapid deployment CCTV systems specifically designed to secure data centre construction sites from ground-breaking to project completion.

Our solutions deliver an immediate security presence, deterring intruders and enabling real-time monitoring to prevent costly delays.

With rental and purchase options, our systems allow you to scale security as needed, ensuring complete protection throughout the build.

Proven Security Solutions for Critical Build Sites

Managed Service

Our CCTV Towers come with a fully managed service, covering installation, maintenance, alarm monitoring, connectivity, technical support and reporting. Whilst you focus on the build, we'll handle security, ensuring complete site protection.

Rental Systems

Whether you need site security for a short-term phase or the full duration of the project, our solutions adapt to your needs. With rental and purchase options, you get security when and where you need it.

Crime Deterrent

Standing 7m tall and painted bright yellow, our CCTV towers provide a clear visual deterrent, warning potential intruders that your high value site is protected and under active surveillance.

Remote Monitoring

Stay connected to your project from anywhere with our free mobile app and desktop platform. View live and recorded footage, respond to incidents in real time or let our NSI Gold Accredited monitoring team to handle security for you.

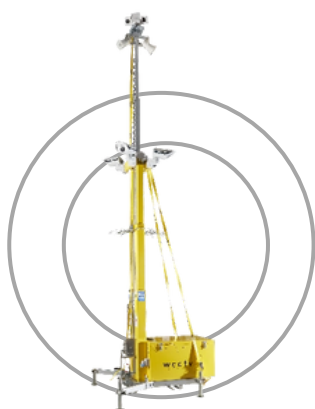

Reduce Costs

Our fully managed security service delivers proactive, around-the-clock protection at a fraction of the cost of traditional guarding. Combining video analytics, remote monitoring, and rapid response, it offers a smarter, more efficient form of security.

Proven Protection

As the UK's leading provider of CCTV solutions for critical infrastructure projects, our systems meet the highest security standards, ensuring reliable protection for data centre developments.

Deployable CCTV for High-Value Build Sites

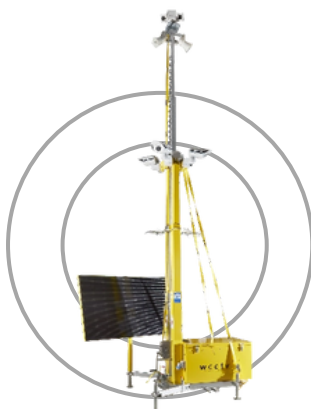

Eco Tower

The WCCTV Eco Tower is a battery-powered CCTV solution ideal for reducing fuel use, noise, and emissions on low-power sites.

CCTV Rental for Data Centre Construction

No Upfront Costs – Just Smart Security

Data centre construction projects only require temporary security solutions to prevent theft, trespass and disruption. Purchasing security systems comes with upfront costs, maintenance and storage challenges, making rental more cost-effective and flexible.

Our CCTV rental service provides immediate, reliable protection without long-term commitments. Our solutions allow you to scale security as your project evolves, ensuring every stage - from groundwork to commissioning - remains protected.

With rental options, you get CCTV Towers when and where you need them, adjusting coverage as risks change. Prevent delays, secure your site and keep your project on track with WCCTV.

Renting CCTV is Best for Data Centre Builds

Security That Scales With Your Project

Data centre construction projects move fast, and security needs change at every stage. Renting CCTV ensures your protection adapts to changing risks, providing coverage exactly where and when it's needed.

With WCCTV's rental service, you get expert security without the burden of ownership. We handle delivery, installation, monitoring, maintenance and removal, so your team can focus on the build.

- **No Upfront Costs:** Comprehensive security with no capital investment
- **Quick Deployment:** We deliver, install and maintain your system
- **Scalable Coverage:** Adjust your security as projects evolve
- **Latest Technology:** Access advanced surveillance kit without upgrade costs

Security Services Managed For You

Fully Managed Security for Data Centre Projects

Data centre construction projects require tight security at every stage, but managing security shouldn't slow down the build. WCCTV's fully managed service ensures your site stays protected without adding to your workload.

We handle everything - from site surveys and CCTV tower installation to live monitoring, mobile guard response, maintenance and ongoing support.

You'll also have full access to our mobile app and desktop platform, giving you real-time oversight and complete control.

With nationwide coverage and rapid response, WCCTV delivers comprehensive, proactive security, keeping your data centre secure.

Live Video Monitoring for Data Centre Construction

Your Virtual Security Team

Installing a CCTV Tower at your data centre construction projects will immediately strengthen your security profile, but why just record crime when you can prevent it?

With WCCTV's live video monitoring services, an NSI Gold Accredited security team will oversee your site, detect threats and trigger an immediate response before crimes occur.

The built-in infrared detection system in our CCTV towers creates a virtual perimeter around your site, and if an intruder attempts to gain access, our monitoring team is immediately notified, allowing them to activate deterrent and intervene to secure your assets.

- 1 Live audio warnings** to challenge intruders before they act
- 2 Immediate escalation** to police or on-site security for a rapid response

Mobile Keyholding for Data Centre Sites

We Respond, So You Don't Have To

Strengthen your security profile beyond CCTV Towers and live monitoring with our Mobile Keyholding Response, which ensures a rapid on-site presence when it's most needed.

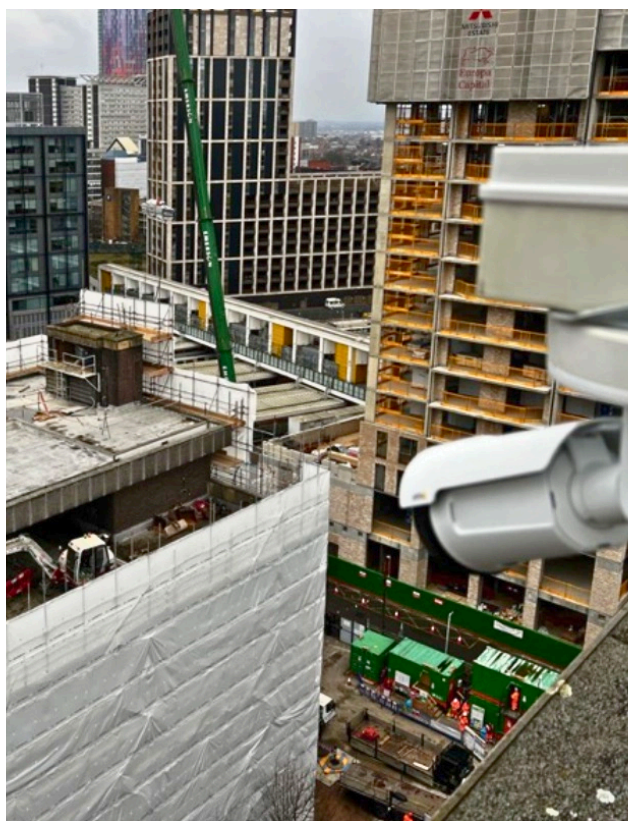

If unauthorised activity is detected at your sites, we will dispatch trained security professionals to assess and manage the situation - meaning the site manager won't have to be disturbed in the middle of the night.

Instead of taking a 2am phone call about a security breach, let our experienced personnel secure the site, handle escalation if required, and provide a full incident report so that you know exactly what happened.

With CCTV cameras, live monitoring, and mobile security response, your data centre project stays protected without disrupting you or your team.

Time Lapse Filming for Data Centre Construction

Capture Every Stage of Your Build

Data centre projects are complex, high-value builds that require detailed documentation. WCCTV provides high-quality time lapse video solutions to capture every stage, from ground-breaking to completion.

Even at sites without power or connectivity, our autonomous cameras ensure continuous recording, providing a seamless visual record of the construction process.

Our in-house production team transforms raw footage into a professional, shareable video with music, animations and text overlays, perfect for stakeholder engagement, marketing or project documentation.

Perfect for stakeholder engagement, progress tracking and marketing, time lapse videos offer a compelling way to highlight the impact of your critical build site.

Why Choose WCCTV for Your Surveillance Solution

UK's Most Established CCTV Tower Supplier

WCCTV is the UK's original and most experienced supplier of rapid deployment CCTV towers.

We don't resell third-party equipment or bolt together off-the-shelf kits. Every tower is developed in-house by our own engineering team and supported by a service model built around the needs of real sites in the UK.

Our product range is the most complete on the market, with tower variants for every power setup, environment and deployment type. From construction sites and infrastructure projects to public space monitoring and vacant property protection, our systems are trusted by hundreds of organisations across the UK.

Whether you need one tower or a full network, Wireless CCTV gives you proven technology, complete control and full-service support from a single provider.
