Transport & Logistics Hubs Security

Security for Ports, Airports & Distribution Centres

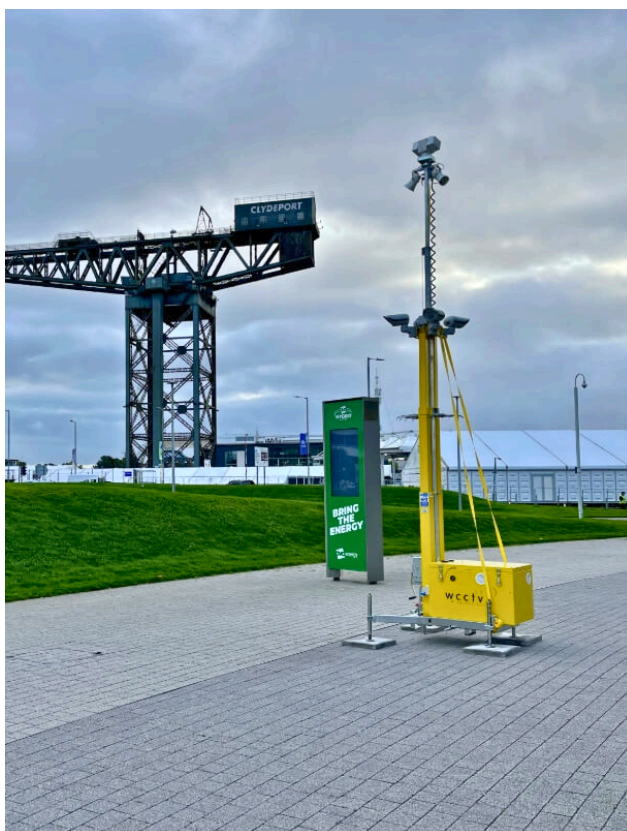

Protecting the UK's Transport & Logistics

Transport and logistics hubs never stop moving, making security a constant challenge. From ports handling high-value cargo to airports managing restricted zones, these sites face persistent threats that can lead to theft, disruption and safety risks.

Securing these environments requires specialist solutions, whether for operational sites or new infrastructure projects.

WCCTV's rapid deployment CCTV systems provide immediate protection with CCTV Towers that offer real-time threat detection, proactive deterrence and remote monitoring.

With rental and purchase options available, our solutions adapt to your site's specific security requirements, ensuring uninterrupted protection. Let us handle security while you keep the country moving.

Why Transport Operators Choose WCCTV

Managed Service

Our CCTV Towers come with a fully managed service that covers installation, maintenance, alarm monitoring, connectivity, technical support and reporting. While you focus on operations and supply chain management, we handle security.

Rental Systems

Security requirements in transport hubs can change rapidly. Whether you're securing a permanent site or a new-build logistics project, we offer rental and purchase options, so you get the right level of protection without unnecessary costs.

Crime Deterrent

At 7m tall and painted bright yellow, our CCTV Towers create a highly visible deterrent, sending a clear message that your transport hub is under surveillance. Ideal for ports, cargo terminals and restricted airport zones where security presence is essential.

Remote Monitoring

Monitor your logistics site from anywhere using our free mobile app and desktop platform. Access live and recorded footage, respond to incidents in real time or let our NSI Gold Accredited monitoring team handle security for you.

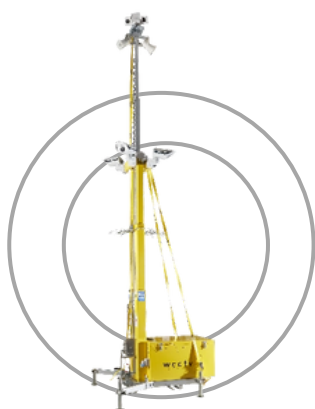

Reduce Costs

Our fully managed security service delivers proactive, around-the-clock protection at a fraction of the cost of traditional guarding. Combining video analytics, remote monitoring, and rapid response, it offers a smarter, more efficient form of security.

Autonomous Options

WCCTV Towers operate using solar, hybrid and fuel cell power, ensuring reliable security for remote transport hubs, off-grid cargo sites and restricted zones - without relying on mains electricity.

Deployable CCTV for Transport & Logistics Hubs

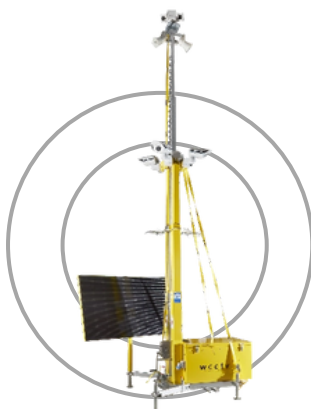

Eco Tower

The WCCTV Eco Tower is a battery-powered CCTV solution ideal for reducing fuel use, noise, and emissions on low-power sites.

CCTV Rental for Transport & Logistics Security

No Upfront Costs – Just Scalable Protection

Not every transport hub security requirement calls for a permanent CCTV installation. Ports, airports and distribution centres often need flexible, temporary security solutions to protect sites during construction, expansion or increased risk periods.

Purchasing security equipment comes with high upfront costs, along with the added burden of storage, maintenance and technology upgrades. Renting from WCCTV eliminates these costs, providing immediate security without long-term commitments.

Renting also allows you to scale security as needed - deploy CCTV Towers when and where required and adjust coverage as your site develops.

Smart CCTV Rental for Transport Hubs

Flexible, Scalable and Cost-Effective Security

Renting is a cost-effective, adaptable solution for temporary security needs, site expansions and scaling protection as risks evolve.

We provide specialist security without the burden of ownership - storage, maintenance, installation - we handle it all.

Key Benefits of CCTV Rental:

- **No Upfront Costs:** Comprehensive security with no capital investment
- **Quick Deployment:** We deliver, install and maintain your system
- **Scalable Coverage:** Adjust your security as projects evolve
- **Latest Technology:** Access advanced surveillance kit without upgrade costs
- **Easiest Procurement:** Avoid long approval processes

Comprehensive Security, Fully Managed

Managed Security for Transport & Logistics

Improving your security profile shouldn't mean increasing your workload. WCCTV's end-to-end managed services means your sites remain protected while you focus on the day job.

We handle everything from expert advice on camera placements, installation, live monitoring, mobile guard response, maintenance and ongoing support.

You'll also have full access to our mobile app and desktop platform, which gives you real-time oversight and complete control.

With nationwide coverage and rapid response, WCCTV delivers specialist, proactive security to protect the transport hubs that keep the UK's critical infrastructure running.

Live Video Monitoring for Transport & Logistics Hubs

Your Virtual Security Team

A CCTV Tower provides a strong security presence, but why just record crime when you can prevent it in real time?

With WCCTV's live video monitoring, an NSI Gold Accredited security team oversees your site, detecting threats and triggering an immediate response before incidents escalate.

Our CCTV Towers use infrared detection to establish a virtual perimeter around ports, airports and distribution centres. If an intruder attempts to gain access, our monitoring team is alerted instantly, activating deterrents and escalating the response as needed.

- 1 Live audio warnings** to challenge intruders before they act
- 2 Immediate escalation** to police or on-site security for a rapid response

Mobile Keyholding for Transport & Logistics Hubs

We Respond, So You Don't Have To

Strengthen security beyond CCTV Towers and live monitoring with Mobile Keyholding Response, ensuring a rapid on-site presence when it matters most.

If unauthorised access or suspicious activity is detected, trained security personnel are dispatched immediately to assess and manage the situation - removing the burden from site managers and operations teams.

Instead of taking a late-night call about a security breach, you can rely on professionals to secure the site, escalate the response if needed, and provide a full incident report.

With CCTV surveillance, live monitoring and mobile response, your transport hub, port or distribution centre stays protected.

Why Choose WCCTV for Your Surveillance Solution

UK's Most Established CCTV Tower Supplier

WCCTV is the UK's original and most experienced supplier of rapid deployment CCTV towers.

We don't resell third-party equipment or bolt together off-the-shelf kits. Every tower is developed in-house by our own engineering team and supported by a service model built around the needs of real sites in the UK.

Our product range is the most complete on the market, with tower variants for every power setup, environment and deployment type. From construction sites and infrastructure projects to public space monitoring and vacant property protection, our systems are trusted by hundreds of organisations across the UK.

Whether you need one tower or a full network, Wireless CCTV gives you proven technology, complete control and full-service support from a single provider.
