# Depot & Rolling Stock Protection

# How We Protect Depot & Rolling Stock Protection

## Tailored Solutions for Rail Environments

**Depots, sidings, and maintenance yards often house high-value equipment and rolling stock, particularly outside of working hours when sites are less populated and more vulnerable to unauthorised access or theft.**

These areas are frequent targets for trespassers and vandals, posing ongoing security challenges.

WCCTV's Towers and Redeployable Cameras offer wide-area surveillance without the need for fixed infrastructure, enabling rapid deployment and easy repositioning as site layouts and security needs change.

Systems can be linked to live monitoring for real-time response and evidence collection.

# Network Rail WCCTV Tower

## Trackside Approved Safety & Security

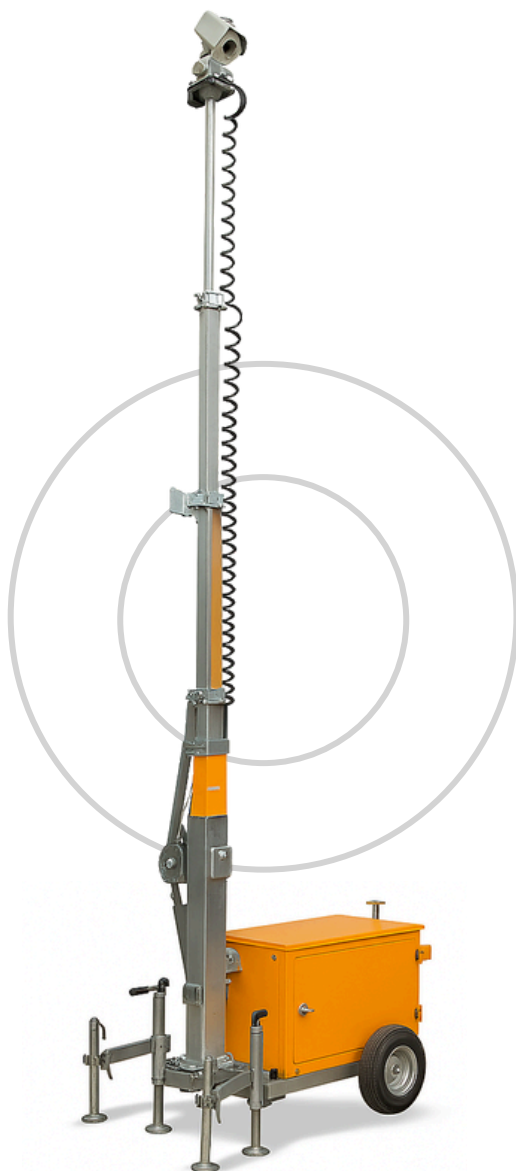

**The WCCTV Network Rail Tower is a rapid deployment CCTV tower designed specifically for use on rail infrastructure projects.**

Standing 7m tall and painted Network Rail orange, it features a PTZ camera mounted at height to provide a strong visual deterrent and full-site visibility.

Approved for trackside use by Network Rail (PADS Certificate: PA05/04778), the tower supports security, workforce safety, compound oversight and time lapse footage capture.

### Key Features Include:

- Non-conductive mast and chassis for trackside deployment.
- Backed by advanced motion detection technology and live monitoring services.
- Save up to 88% on costs compared to employing physical guarding services.

# Why Choose WCCTV for Your Surveillance Solution

## The Trusted Choice for Rail Security

**WCCTV has over 20 years of experience securing rail projects across the UK. We've worked directly with Network Rail and Tier 1 contractors during every Control Period, building a reputation for reliability, compliance and results.**

Our systems are PADS approved, deployed by Sentinel-trained teams and backed by NSI Gold Accredited monitoring partners.

Every product is developed in-house to meet the demands of remote, high-risk and fast-moving rail environments.

From trackside equipment and depots to stations and compounds, we understand the challenges rail teams face and tailor our solutions accordingly.

With WCCTV you get more than a product. You get a fully managed service trusted by those delivering critical rail infrastructure.
