

WCCTV

Station Staff Safety & Security

How We Protect Station Staff and Their Safety

Tailored Solutions for Rail Environments

WCCTV supports rail staff with body cameras that reduce abuse, false complaints and unsafe interactions in public-facing roles.

Our body worn units are deployed across the UK rail network to support safety, build confidence and provide objective evidence during customer interactions.

Footage can be reviewed for incident resolution and shared with ROCs or management teams as required. They're particularly effective for lone workers, gate line staff and revenue protection officers.

Explore our award-winning UK manufactured body cameras for your staff safety.

Network Rail WCCTV Tower

Trackside Approved Safety & Security

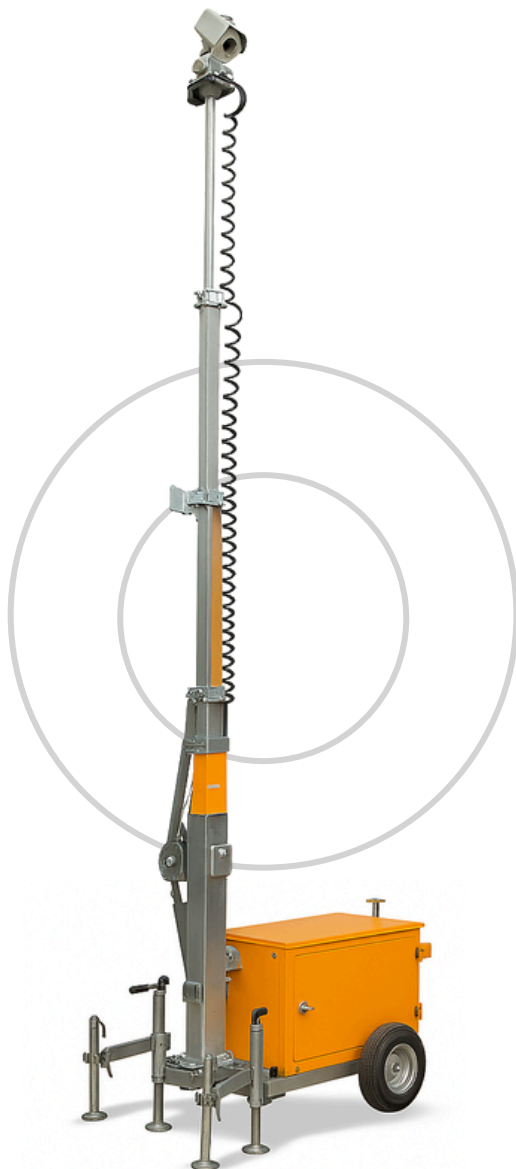

The WCCTV Network Rail Tower is a rapid deployment CCTV tower designed specifically for use on rail infrastructure projects.

Standing 7m tall and painted Network Rail orange, it features a PTZ camera mounted at height to provide a strong visual deterrent and full-site visibility.

Approved for trackside use by Network Rail (PADS Certificate: PA05/04778), the tower supports security, workforce safety, compound oversight and time lapse footage capture.

Key Features Include:

- Non-conductive mast and chassis for trackside deployment.
- Backed by advanced motion detection technology and live monitoring services.
- Save up to 88% on costs compared to employing physical guarding services.

Why Choose WCCTV for Your Surveillance Solution

The Trusted Choice for Rail Security

WCCTV has over 20 years of experience securing rail projects across the UK. We've worked directly with Network Rail and Tier 1 contractors during every Control Period, building a reputation for reliability, compliance and results.

Our systems are PADS approved, deployed by Sentinel-trained teams and backed by NSI Gold Accredited monitoring partners.

Every product is developed in-house to meet the demands of remote, high-risk and fast-moving rail environments.

From trackside equipment and depots to stations and compounds, we understand the challenges rail teams face and tailor our solutions accordingly.

With WCCTV you get more than a product. You get a fully managed service trusted by those delivering critical rail infrastructure.
