Events & Crowd
Management CCTV

Protecting Large Scale Events with WCCTV's Advanced Surveillance Solutions

WCCTV provides rapid deployment systems tailored for events, offering real-time monitoring, crowd management, and incident response. Our flexible, self-powered units ensure safety and security across festivals, concerts, sports events, and public gatherings.

Large-scale events present unique security challenges, from managing crowd behaviour to protecting valuable infrastructure and monitoring health and safety. With thousands of people on-site, real-time visibility is essential.

All systems are available on a flexible rental basis and backed by a fully managed service. That includes installation, live video monitoring, ongoing maintenance and access to footage via our mobile and desktop platforms. Wherever your event takes place, we provide reliable protection for the public. Whether it's a music festival, sporting event or conference, our cameras deliver high-quality video coverage with minimal setup.

Why choose WCCTV?

- **Market-leading** wireless CCTV solutions
- **Fully-Managed Service**
- **24/7/365** remote monitoring
- **Rapid Deployment & Nationwide Support**
- **Integrated AI analytics**
- **Cost effective** alternative to guarding
- **Solar & battery** powered options
- **Integrated solutions for full-site coverage**

At WCCTV, we leverage over 20 years of industry expertise, cutting-edge technology and a comprehensive range of wireless surveillance solutions to deliver a rapid and effective security response tailored to your crowd management needs.

Reduce Security Costs by up to

88%

Rapid Deployment CCTV Towers

WCCTV's mobile CCTV towers are designed to secure large, complex, and fast-moving event environments. They're widely used at music festivals, sports fixtures, conventions, political summits, public demonstrations, stadiums and large outdoor rallies.

The towers offer high-definition multi-camera coverage, infrared motion detection, and live audio address to deter unwanted activity. Optional ANPR integrations support vehicle access control for event logistics and restricted zones. All footage is accessible via desktop and mobile, with our NSI Gold accredited partners providing real-time video monitoring.

Systems are available to rent and come with a managed service that includes installation, live monitoring, maintenance, and remote diagnostics. Wherever your event takes place, WCCTV provides scalable, visible protection that keeps everything under control. No fixed internet or power is required.

Our ultra-reliable managed security services can save up to **88%** when compared with the cost of traditional guarding services, without compromising results.

We back our CCTV systems with a **full service** that includes installation, maintenance, alarm monitoring, connectivity, support and ongoing reporting.

With our camera **rental options**, you only need to pay for security when needed. No need to worry about transporting the Towers from job-to-job: we'll deliver and take it away.

At **6m tall** and **bright yellow**, our CCTV Towers are an unmistakable presence on your sites - warning intruders that your site is under our watchful eye.

Temporary CCTV Solutions for Every Event

Eco Tower

The WCCTV Eco Tower is a mobile CCTV unit designed for sites looking to reduce generator use, fuel consumption and external noise.

Redeployable CCTV Cameras

WCCTV's redeployable cameras are the ideal solution for targeted coverage at events with complex layouts, changing security needs or areas not suited for towers.

They can be installed on existing infrastructure such as lighting columns, buildings or temporary masts to monitor entry gates, concession areas, walkways and key crowd zones. These systems are perfect for high-footfall zones that require flexible placement and a smaller footprint. As with all WCCTV products, redeployable units are supported by live video monitoring and a fully managed service.

The wireless connectivity of WCCTV's Redeployable Cameras enables remote access to live and recorded footage via WCCTV's secure platform or mobile app, allowing site managers and security teams to monitor your events from anywhere. Integrated AI-powered video analytics enhance efficiency by detecting suspicious activity, and reducing false alarms.

Our Redeployable Cameras can be installed and operated in **under 20 minutes**, providing a dynamic response to emerging and developing crime patterns.

WCCTV's unique **mobile transmission technology** allows you to access footage from your cameras via our desktop software and smartphone app anytime, anywhere.

All of our redeployable units feature **three** additional input channels, allowing for bolt-on solutions such as **ANPR** cameras and blue light alarms to be added.

With our cameras we provide a built-in remote diagnostics tool, **WCCTV Heartbeat**, which continually checks the camera is performing to optimal levels.

Remote Video Monitoring

Our Remote Monitoring service allows security cameras to be closely monitored by a team of professionals who can issue real-time audio alerts and dispatch police where necessary, ensuring your premises and assets are completely protected when you're not there.

WCCTV's surveillance systems can be connected to live video monitoring services delivered by our NSI Gold accredited partners. Monitoring teams provide real-time oversight of key event areas including:

- Entries, exits and perimeters
- Crowd hotspots
- Car parks and temporary road closures

When unusual activity is detected, they can intervene immediately. That includes triggering alarms, activating audio address systems or escalating to on-site teams. This proactive approach help deter anti-social behaviour, monitor crowd surges and bottlenecks and respond quickly to medical incidents or emergencies.

Our partner monitoring station provides a detailed report of **any incidents** taken place at your locations and give details on what action was taken - including speed of action.

Cheaper doesn't mean less effective. Our monitored CCTV systems are **always alert, always on guard** and can spot criminals even in complete darkness.

If an intrusion is detected at your site, a remote CCTV operator can activate the inbuilt blue lights, siren and voice-down systems on a Site Tower, acting as a **proven deterrent.**

Our partner monitoring station is an **NSI Gold Approved** UK-based Alarm Receiving Centre (ARC), operating sites 24 hours a day, 365 days a year.

Body Worn Cameras

WCCTV's body cameras provide frontline teams with an added layer of safety when working among large crowds at events. They help deter aggressive behaviour, support post-incident reviews and offer valuable footage for compliance and training.

Our systems are trusted by local authorities, event organisers and private security teams working across major public gatherings to capture vital evidence and support personal safety. Key features include:

- One-touch recording
- Full HD video with audio
- Secure, tamper-proof storage
- Integration with WCCTV's camera systems

Whether monitoring entrances, patrolling event zones or dealing with public safety incidents, body-worn cameras support a safer, more accountable working environment.

The distinctive forward-facing screen on WCCTV's body cameras plays a significant role in **de-escalating conflict**. Individuals behave better when recorded.

Small, discreet and lightweight, WCCTV's body cameras are **barely noticeable** to the wearer once they are attached. Despite the size, it contains market leading features.

The device's **1080p video recording** capability means you will capture high-quality video evidence, whether for police investigations or training employees.

The optional extended battery pack easily clips onto the bottom of the Body Camera, providing an additional **8 hours of run time**, making it ideal for long periods.

Typical Use Cases for Event Surveillance

Music Festivals

Secure expansive event spaces, monitor crowd movement and protect valuable infrastructure with real-time video coverage.

Sports & Stadiums

Support venue safety and coordinate crowd management across stadiums, fan zones and transportation hubs.

Demonstrations & Rallies

Enable local authorities and event organisers to maintain visibility and respond proactively to changing conditions.

Convention Centres

Secure high-value indoor and outdoor setups, prevent theft and manage access control across complex venues.

Security Solution	Description
 ANPR Cameras	Tracks and records vehicle movements, preventing unauthorised access to construction sites and infrastructure projects.
 Thermal Imaging CCTV	Detects heat signatures for intrusion detection in low-light conditions or fire prevention on construction sites.
 AI Video Analytics	Intelligent surveillance that reduces false alarms, detects unauthorised access and enhances security response times through automated alerts.
 Bodyworn CCTV	Wearable security solutions to ensure the safety of remote and isolated workers, with real-time monitoring and emergency alerts.
 Evidence Software	Our Evidence Management Software (EMS) is designed to provide users with a simple solution for managing digital files captured by a WCCTV Body Worn Camera.
 Software Solutions	Our software allows you to add cameras, control them, create automated tours, receive alerts and view live and recorded footage at any time, anywhere.

WCCTV: Industry Leader in Large-Scale Events Security

For over 20 years, WCCTV has been at the forefront of wireless CCTV security, providing industry-leading surveillance solutions that protect music festivals, sports stadiums and convention centres. Our cutting-edge technology and proven expertise ensure seamless security coverage, reducing the risk of theft, vandalism and unauthorised access.
