

# WCCTV

## Fully-Managed Security Service

# Our Fully-Managed Security Service

## End-to-End Site Security, Managed for You

**Across our full product range, WCCTV supplies a comprehensive service plan designed to deliver peace of mind and convenience, ensuring you receive the highest level of operational effectiveness.**

Our ambition in making CCTV cameras and security equipment as user friendly as possible has shaped a step-by-step process that reduces our customer's workload and provides them with a service that delivers the right results every time.

### What's Included:

- Site assessment & strategic system placement
- Delivery, installation & system setup
- Live video monitoring & mobile keyholding
- Maintenance, support & remote diagnostics
- Access to live and recorded footage via desktop and mobile

# Site Assessments & Guidance on Cameras

**Before installing a WCCTV Rapid Deployment CCTV system, we take the time to fully understand your security requirements.**

Our experienced security specialists will guide you through a simple consultation process to ensure we recommend the right system for your site. With over 20 years of experience, we know that every site is different – and your security solution should reflect that.

We'll ask key questions about: power availability on-site, site size, layout, and access points, vulnerable or sheltered areas, hours of operation and protection requirements, project duration and whether it's temporary or long-term need, and specific risks, materials or tools present on-site.

We offer a free, no-obligation site survey to assess your layout, risks, and blind spots - helping us recommend optimal camera placement, the need for video analytics, and if a fully autonomous power solution is required.

# Professional Installation and System Activation

**As part of our fully managed security service, our expert CCTV Engineers take care of everything - so you don't have to.**

They'll attend your site to install all required equipment, including: Rapid Deployment CCTV Towers, Redeployable Dome Systems, Time Lapse Video Cameras and Permanent CCTV Installations.

Once on site, they'll also configure your systems to ensure optimum performance, including:

- Testing detection zones
- Setting up intelligent video analytics
- Installing alarms and voice-down audio deterrents
- Providing access to our free, license-free viewing software and mobile app
- Commissioning Time Lapse Cameras in collaboration with our video editing team

You'll have peace of mind knowing your system is expertly installed, configured, and ready to protect from day one.

# Live Alarm Monitoring by Trained Professionals

**Visible, proactive, and always on guard - CCTV is more than just a camera. It's your first line of defence against trespassing, theft, and vandalism.**

When paired with WCCTV's professional Remote Video Monitoring service, your system becomes a virtual security guard: live, responsive, and ready to act 24/7.

All WCCTV Rapid Deployment Towers and Dome Cameras stream high-quality live and recorded footage via 4G/5G connectivity, which can be routed directly to our NSI Gold Accredited Alarm Receiving Centre (ARC).

From here, our expert security operators assess every alarm in real-time, verify incidents, and take immediate action — whether that's dispatching a mobile response unit or alerting the Police.

**Learn More Here**

# Mobile Keyholding and Incident Response

**We know the feeling - it's 2am, and your phone rings. There's been a security breach. While CCTV is great for detection, who takes action when something actually happens?**

With WCCTV, you don't have to. Our Rapid Deployment CCTV systems come fully backed by a Mobile Keyholding and Incident Response service - giving you round-the-clock protection without the sleepless nights.

When an alarm is triggered:

- Trained security professionals are dispatched to your site immediately.
- They assess the situation, take appropriate action, and provide a detailed incident report for your records.
- If necessary, they'll liaise directly with emergency services on your behalf.

**Learn More Here**

# Technical Support and Preventative Maintenance

**With any security solution, there is the possibility of product depreciation and software errors which could negatively impact the service in which you receive.**

In addition to the diagnostics service we provide, we have technical support and customer service experts that can be contacted if you require any assistance.

Using their knowledge and expertise, they will help to clearly guide you through any troubleshooting processes or explain the steps being taken to resolve any issues logged with ourselves.

However, most importantly, we ensure to run regular diagnostics reports and maintenance check-ins to ensure both our service and products continue to provide the high-level security service promised.

This allows us to catch any potential issues early and respond promptly before it impacts your security.

# Full Incident, Uptime and False Alarm Reports

**We know that entrusting your site's security to an external provider can feel daunting - even when that provider has over 20 years of proven experience. That's why we make it a priority to keep you fully informed and involved.**

Our fully managed service includes comprehensive reporting to ensure you're always in the loop. You'll receive detailed incident reports, uptime summaries, and false alarm insights - giving you a clear view of how your system is performing.

These reports give you the confidence to assess the service we provide, ask the right questions, and plan future security needs with greater certainty.

Our reporting isn't just about ticking boxes or meeting service standards - it's a vital tool for ongoing improvement. By sharing clear, consistent data with our customers, we stay accountable, build trust, and identify opportunities to enhance your security

# How Does Our Managed Service Protect Your Site?

**As part of our fully-managed security service, a team of NSI Gold Accredited security experts will be monitoring your sites - proactively protecting them from theft and criminal damage.**

If an intruder is spotted on your site, the team will:

- 1** Issue Audio Warnings: Once an intruder alert is verified, our monitoring partners will issue an audio warning.
- 2** Contact the Police: Once an intrusion is detected, our monitoring team immediately alerts the Police.
- 3** Inform You: Once we know the site has been protected and a response is en-route, our team will reach out to.
- 4** Keep Watch: Our monitoring partners will continue to monitor the site - including the entire perimeter.
- 5** Package Evidence: Up to 4TB capacity evidence can be provided to the police.

# Who Should Use Managed CCTV Cameras?

**With over 20-years experience in supplying Rapid Deployment CCTV systems across the country, we have gained insight into the key applications managed CCTV cameras benefits. These include:**

**Construction Sites:** Protect valuable materials, plant, and equipment from theft and vandalism with rapid-deployment cameras and live monitoring - even on sites with no power or connectivity.

**Vacant Properties:** Deter trespassing, fly-tipping, and arson with a visible, proactive security presence that doesn't rely on manned guards or permanent infrastructure.

**Utility & CNI Sites:** Monitor critical national infrastructure around the clock with high-spec CCTV solutions that support compliance and rapid incident response.

**Other industries include:** Traffic Management & Highways, Rail Projects, Events & Public Spaces, & Local Authorities.

# Our Range of Rapid Deployment CCTV Towers

**Eco Tower**

WCCTV's Eco Tower is a rapid deployment CCTV Tower specifically designed to provide security at construction sites where generator power is available.

[Learn More](#)

**Solar Fuel Cell Tower**

WCCTV's Solar Fuel Cell Tower is a rapid deployment CCTV tower designed to provide autonomous site security at locations without power.

[Learn More](#)

**Thermal Solar Tower**

An autonomous CCTV Tower designed to provide complete site security, where temporary monitoring is required on transient sites or compounds.

# WCCTV Tower Variations and Add-Ons

## Build a Solution That's Right for Your Site

### Solar and Hybrid-Powered CCTV Towers:

Perfect for locations without fixed power, our autonomous towers operate using [solar panels](#) and [fuel cells](#), delivering continuous uptime with minimal maintenance.

### ANPR Cameras:

Add [automatic number plate recognition](#) to track vehicle movements or monitor and control access points.

### Time Lapse Cameras:

Capture a full project documentation alongside your security footage with our high-resolution [time lapse cameras](#).

### Site Condition Monitoring Sensors:

Add IoT-based [environmental sensors](#) to monitor dust, noise, vibration, weather and air quality for compliance reporting.

## **Stellifii: Smart by Day Secure by Night**

**Stellifii is WCCTV's UK-manufactured platform that delivers mobile surveillance, monitoring and remote insight. It combines video, analytics and IoT data in a powerful, cloud-based ecosystem designed to give users full visibility, intuitive functionality and intelligence.**

But it's more than just a Video Management System (VMS) or transmission platform, it's a complete cloud-based ecosystem that transforms how mobile surveillance solutions operate and how users interact with them.

It brings together wireless video connectivity, condition monitoring data, system diagnostics and reporting tools into a single interface that can be accessed at any time from anywhere. Developed completely in-house by WCCTV, Stellifii delivers a comprehensive solution for remote monitoring, control and actionable intelligence. Whether you're monitoring cameras, pulling air quality data or generating a compliance report, Stellifii can do it all.

**Stellifii consists of: Safety PPE / Traffic, Smoke & Fire Detection, License Plate Recognition, Environmental Monitoring, Weather Monitoring, Performance Diagnostics, Video Options (IR, PTZ etc), Live Automated Audio, LED Deterrence, Time Lapse, Secure Cloud Software and Mobile Applications.**

Stellifii is fully built and managed by WCCTV in the UK. This means faster innovation, direct support and complete control over performance, updates and data security.

Access footage, control settings and generate reports from anywhere.

No need for DVRs, server racks or manual retrieval. Just log in and manage your entire network.

Plug in environmental monitoring tools, gather air quality data, check decibel levels or run compliance reports from one platform. Stellifii moves beyond standard security.

Built on UK government-approved infrastructure with AES256 encryption & European or North American components as standard. Fully compliant & future-proofed.

# WCCTV Hornet: Perimeter Intrusion Detection

## Compact. Reactive. Ready to Deploy.

The WCCTV Hornet is a compact Perimeter Intrusion Detection (PID) system that delivers 360° coverage, motion-triggered video capture, and live audio challenges. I

Ideal for tight or temporary construction sites, it operates without fixed power or communications, providing instant protection in minutes.

The Hornet isn't just a product - it's part of WCCTV's fully managed security service. From installation to ongoing support, we handle everything so you don't have to.

There's no need to purchase, store, or maintain any equipment – saving you time, hassle, and upfront costs. The Hornet is available on a flexible rental basis with no long-term commitment, making it the perfect solution for short-term projects, emergency deployments, or temporary coverage to bridge security gaps.

# Why Choose WCCTV for Your Surveillance Solution

## UK's Most Established CCTV Tower Supplier

**WCCTV is the UK's original and most experienced supplier of rapid deployment CCTV towers.**

We don't resell third-party equipment or bolt together off-the-shelf kits. Every tower is developed in-house by our own engineering team and supported by a service model built around the needs of real sites in the UK.

Our product range is the most complete on the market, with tower variants for every power setup, environment and deployment type. From construction sites and infrastructure projects to public space monitoring and vacant property protection, our systems are trusted by hundreds of organisations across the UK.

Whether you need one tower or a full network, Wireless CCTV gives you proven technology, complete control and full-service support from a single provider.
