

WCCTV

Logistics and Distribution Centres

Protecting Your Logistics with WCCTV's Advanced Surveillance Solutions

WCCTV supplies mobile, rapidly deployed CCTV systems backed by live video monitoring and a fully managed service. Our temporary security units help logistics and distribution centres prevent theft, trespass and downtime by protecting warehouses, loading bays and goods in transit.

Warehouses, logistics hubs and distribution centres face daily risks from theft, trespass and disruption. Around 41% of cargo theft incidents across the UK happen at warehouses, often involving organised groups targeting goods in storage or in transit.

With fast deployment and flexible coverage, we help security teams protect high-value stock, loading areas and staff without the cost or delays of permanent installations. Our systems create a visible deterrent, deliver real-time alerts and support investigations with clear footage.

Why choose WCCTV?

- **Market-leading** wireless CCTV solutions
- **Fully-Managed Service**
- **24/7/365** remote monitoring
- **Rapid Deployment & Nationwide Support**
- **Integrated AI analytics**
- **Cost effective** alternative to guarding
- **Solar & battery** powered options
- **Integrated solutions for full-site coverage**

At WCCTV, we leverage over 20 years of industry expertise, cutting-edge technology and a comprehensive range of wireless surveillance solutions to deliver a rapid and effective security response tailored to your distribution needs.

Reduce Security Costs by up to

88%

Rapid Deployment CCTV Towers

Warehouses and distribution centres store high-value goods and operate on tight schedules, making them frequent targets for theft, trespass and disruption. With high volumes of vehicle traffic, frequent staff turnover and complex site layouts, maintaining full visibility can be a constant challenge.

Towers are commonly used to monitor vehicle yards, loading bays, entrances, and perimeter zones. They offer a reliable, flexible way to protect stock, staff and site operations, especially where risk areas shift or space is reconfigured.

Standing 7m tall, they are equipped with high-definition PTZ cameras, infrared night vision, audio challenge capability and full 360-degree coverage. They run on solar, hybrid or fuel cell power and use 4G/5G connectivity for remote access and live monitoring. Installation is fast and straightforward and the units can be provided on a rental basis with live video monitoring, professional setup, maintenance and remote diagnostics included.

Our ultra-reliable managed security services can save up to **88%** when compared with the cost of traditional guarding services, without compromising results.

We back our CCTV systems with a **full service** that includes installation, maintenance, alarm monitoring, connectivity, support and ongoing reporting.

With our camera **rental options**, you only need to pay for security when needed. No need to worry about transporting the Towers from job-to-job: we'll deliver and take it away.

At **6m tall** and **bright yellow**, our CCTV Towers are an unmistakable presence on your sites - warning intruders that your site is under our watchful eye.

CCTV Systems for Logistics and Distribution

Eco Tower

The WCCTV Eco Tower is a mobile CCTV unit designed for sites looking to reduce generator use, fuel consumption and external noise.

[> Learn More](#)

Solar Fuel Cell Tower

The WCCTV Solar Fuel Cell Tower is a self-powered CCTV unit for remote sites, running without mains power or generators.

[> Learn More](#)

Thermal Solar Tower

This solar-powered CCTV system combines thermal and optical cameras with onboard analytics to detect and deter intrusions.

Redeployable CCTV Cameras

Redeployable CCTV cameras offer a practical solution for sites where risk areas move or permanent infrastructure isn't an option. These units are compact, easily installed and deliver reliable protection across entrances, internal environments and isolated areas.

Cameras can be mounted to existing poles, buildings or fixtures, giving you the flexibility to respond to layout changes, security incidents or site expansion. They feature high-definition cameras, onboard storage and 4G/5G connectivity for live monitoring and remote access.

These systems are often used to cover delivery bays, staff entrances, secondary storage areas and internal walkways. Footage can be viewed remotely by site teams or monitored in real time by our NSI Gold accredited partners for faster incident response. Redeployable cameras are supplied on a rental basis and include installation, maintenance, diagnostics and remote support as part of a fully managed service.

Our Redeployable Cameras can be installed and operated in **under 20 minutes**, providing a dynamic response to emerging and developing crime patterns.

WCCTV's unique **mobile transmission technology** allows you to access footage from your cameras via our desktop software and smartphone app anytime, anywhere.

All of our redeployable units feature **three** additional input channels, allowing for bolt-on solutions such as **ANPR** cameras and blue light alarms to be added.

With our cameras we provide a built-in remote diagnostics tool, **WCCTV Heartbeat**, which continually checks the camera is performing to optimal levels.

Remote Video Monitoring

Installing cameras is one thing, but preventing crime before it happens is something else entirely. WCCTV's live video monitoring service ensures your facility is actively protected, not just passively recorded.

Our systems use smart motion detection to create virtual perimeters around key access points, storage zones and vehicle yards. When triggered, an alert is sent directly to our NSI Gold Accredited monitoring partners, who connect to the site in real time, issue an audio warning and escalate where necessary.

How we respond to threats: motion sensors detect movement, operators connect to the site live, audio warnings challenge intruders and police or keyholders are contacted if needed. This proactive approach helps stop cargo theft, trespass and disruption before damage is done. You get peace of mind knowing your site is actively watched and professionally protected.

Our partner monitoring station provides a detailed report of **any incidents** taken place at your locations and give details on what action was taken - including speed of action.

Cheaper doesn't mean less effective. Our monitored CCTV systems are **always alert, always on guard** and can spot criminals even in complete darkness.

If an intrusion is detected at your site, a remote CCTV operator can activate the inbuilt blue lights, siren and voice-down systems on a Site Tower, acting as a **proven deterrent.**

Our partner monitoring station is an **NSI Gold Approved** UK-based Alarm Receiving Centre (ARC), operating sites 24 hours a day, 365 days a year.

Mobile Key Holding Response

When a security incident occurs out of hours, someone may need to attend site. WCCTV's mobile keyholding service ensures that person isn't one of your team. A trained, licensed security professional responds on your behalf, assesses the situation and takes appropriate action.

Our partners are experienced in handling the specific risks associated with logistics environments, including unauthorised access at perimeter fences to break-ins at storage zones. They attend verified alerts sent by our monitoring team, gain safe entry to the site and issue a full incident report.

Our keyholding service includes: fast response to verified security events, safe access for emergency services or contractors, routine or ad hoc patrols available and full incident reporting after every call-out. It's a simple way to reduce risk, protect your people and ensure incidents are dealt with professionally every time.

Customisable response procedures are developed specifically around your construction site's unique security requirements, providing **targeted solutions** for your site.

Utilising our Mobile Keyholding Response service can help satisfy insurance requirements, **lowering premiums** and demonstrating your commitment to robust security measurements.

Scheduled security patrols provide routine site checks, ensuring continuous vigilance and **proactively deterring** potential security threats before they escalate.

Access to a dedicated incident management team available **around the clock** ensures swift and effective coordination with emergency services near your site.

Protecting All Areas of the UK's Supply Chain

Fulfillment Centres

Monitor loading bays, staff activity and high-value stock across busy fulfillment centres with flexible, visible surveillance systems.

Cross-Dock Facilities

Provide rapid, visible security for fast-moving goods transfer sites with minimal storage and constant vehicle movement.

Third-Party Logistics (3PL) Sites

Boost security at contract-operated logistics sites handling multiple clients and dynamic stock movements.

Cold Storage / Warehousing

Protect high-value temperature-controlled goods from theft, tampering and operational disruption with live cameras.

Security Solution	Description
 ANPR Cameras	Tracks and records vehicle movements, preventing unauthorised access to construction sites and infrastructure projects.
 Thermal Imaging CCTV	Detects heat signatures for intrusion detection in low-light conditions or fire prevention on construction sites.
 AI Video Analytics	Intelligent surveillance that reduces false alarms, detects unauthorised access and enhances security response times through automated alerts.
 Bodyworn CCTV	Wearable security solutions to ensure the safety of remote and isolated workers, with real-time monitoring and emergency alerts.
 Evidence Software	Our Evidence Management Software (EMS) is designed to provide users with a simple solution for managing digital files captured by a WCCTV Body Worn Camera.
 Software Solutions	Our software allows you to add cameras, control them, create automated tours, receive alerts and view live and recorded footage at any time, anywhere.
 Stellifii Platform	Stellifii is a UK Manufactured 5G-ready platform that combines video streaming with smart city applications in a cloud-based ecosystem.

PROTECT

Body Cameras for Safety & Security

**Stellifii: Smart by Day
Secure by Night**

Stellifii is WCCTV's UK-manufactured platform that delivers mobile surveillance, monitoring and remote insight. It combines video, analytics and IoT data in a powerful, cloud-based ecosystem designed to give users full visibility, intuitive functionality and intelligence.

But it's more than just a Video Management System (VMS) or transmission platform, it's a complete cloud-based ecosystem that transforms how mobile surveillance solutions operate and how users interact with them.

It brings together wireless video connectivity, condition monitoring data, system diagnostics and reporting tools into a single interface that can be accessed at any time from anywhere. Developed completely in-house by WCCTV, Stellifii delivers a comprehensive solution for remote monitoring, control and actionable intelligence. Whether you're monitoring cameras, pulling air quality data or generating a compliance report, Stellifii can do it all.

Stellifii consists of: Safety PPE / Traffic, Smoke & Fire Detection, License Plate Recognition, Environmental Monitoring, Weather Monitoring, Performance Diagnostics, Video Options (IR, PTZ etc), Live Automated Audio, LED Deterrence, Time Lapse, Secure Cloud Software and Mobile Applications.

Stellifii is fully built and managed by WCCTV in the UK. This means faster innovation, direct support and complete control over performance, updates and data security.

Access footage, control settings and generate reports from anywhere. No need for DVRs, server racks or manual retrieval. Just log in and manage your entire network.

Plug in environmental monitoring tools, gather air quality data, check decibel levels or run compliance reports from one platform. Stellifii moves beyond standard security.

Built on UK government-approved infrastructure with AES256 encryption & European or North American components as standard. Fully compliant & future-proofed.

WCCTV: Industry Leader in Supply Chain Security

For over 20 years, WCCTV has been at the forefront of wireless CCTV security, providing industry-leading surveillance solutions that protect vehicle yards, cold storage and fulfilment centres. Our cutting-edge technology and proven expertise ensure seamless security coverage, reducing the risk of theft, vandalism and unauthorised access.
