

WCCTV

Body Cameras for Safety & Security

WCCTV's Body Worn Surveillance Cameras

What are Body Cameras?

Body cameras, also known as body worn cameras, are small, lightweight video recording devices designed to be attached to a person's clothing or uniform.

They capture high-quality video, and often audio, from the wearer's perspective, creating an accurate, first-person record of events.

They are widely used in sectors where staff work directly with the public, operate in challenging environments or need to document activities for compliance and training purposes.

By making it clear that interactions are being recorded, body cameras can help deter verbal abuse, physical aggression and anti-social behaviour before it escalates.

Body cameras provide clear, time-stamped footage that can be used as reliable evidence in investigations, reviews or legal proceedings.

Key Features of WCCTV's Body Worn Cameras

Front Facing Screen

The forward-facing screen on WCCTV's Body Cameras is proven to reduce verbal and physical abuse towards staff. By showing individuals they are being recorded, it encourages better behaviour and helps to de-escalate confrontations.

Compact but Durable

WCCTV's Body Cameras are compact and comfortable to wear for extended periods. Despite their small size, they deliver market-leading functionality and durability, making them suitable for demanding, long-shift environments.

High Quality Evidence

Record in 1080p HD for clear, detailed video evidence. This high resolution ensures incidents are captured in sharp detail, supporting investigations, identifying individuals and providing reliable footage for training or review purposes.

Extendable Battery

An optional extended battery pack attaches easily to the camera, adding up to eight hours of additional runtime. This makes the system ideal for long shifts, special events or any application where extended operational hours are essential.

Secure Encryption

All recordings are encrypted to AES 256-bit standards, making them secure and inaccessible to unauthorised users. This ensures compliance with data protection requirements and protects the integrity of your video evidence.

Evidence Software

Our cloud-based Evidence Management Software allows authorised users to securely store, search and manage footage. It offers powerful tools for clipping, annotating and sharing videos, alongside a complete audit trail for accountability.

How do WCCTV's Body Worn Cameras Work?

Capturing Evidence on the Move

Body cameras capture video through a lens positioned on the front of the device. They are typically mounted to the wearer's chest, shoulder or uniform using secure clips, harnesses or magnetic mounts.

Once activated, they capture events from the wearer's viewpoint in high definition, storing the footage on secure, encrypted internal memory. Some units include a forward-facing screen, which acts as a visible deterrent by making it clear to the subject that they are being recorded.

Many body cameras also feature a configurable pre-event recording buffer, ensuring that crucial moments leading up to an incident are captured, even if recording begins after the event starts. By combining simple operation with secure, reliable performance, body cameras are a powerful tool for improving safety, accountability and incident response.

Technical Features of WCCTV's Body Cameras

Key Specifications:

- **Dimensions:** 76mm (H) x 57mm (W) x 28mm (D)
- **Weight:** 124g
- **Recording Resolution:** Full HD 1080p video
- **Screen:** Forward-facing LCD display
- **Controls:** Touchscreen navigation and one-button record/stop
- **Battery Life:** Full-shift operation, optional extended battery (+8 hours)
- **Durability:** Water and dust-resistant design
- **Pre-Event Recording:** Configurable buffer up to 120 seconds
- **Security:** AES 256-bit video encryption
- **Data Management:** Integration with WCCTV Evidence Management Software

This specification ensures our body cameras meet the needs of organisations seeking reliable, high-quality video capture while maintaining data security and ease of use.

Body Camera Products & Accessories

Evidence Management

WCCTV's Evidence Management Software (EMS) is designed to provide users with a simple solution for managing recorded digital files.

Who Should Use Body Worn Cameras?

Enhancing Safety Across Every Sector

Body cameras are a proven tool for improving safety, accountability, and evidence capture in any industry where staff interact with the public or operate in potentially challenging environments.

They help de-escalate aggressive behaviour, provide reassurance to staff and deliver clear, time-stamped video evidence. Sectors include:

- **Retail and supermarkets**
- **Security services**
- **Rail operations and transport networks**
- **Local authorities and councils**
- **Healthcare and NHS environments**
- **Highways and traffic management teams**
- **Emergency services**

Body Camera Rental & Purchase Options

Deployment to Suit Your Needs

WCCTV makes it simple to equip your teams with industry-leading body worn cameras through flexible rental and purchase options.

Rental: Ideal for temporary deployments, seasonal peaks, or organisations trialling body cameras before committing to purchase. Benefit from no upfront costs, rapid nationwide delivery, professional installation guidance and full technical support. When your project ends, simply return the units with no storage or maintenance required.

Purchase: The most cost-effective choice for permanent rollouts or organisations needing constant access to body worn cameras. Ownership ensures consistent availability, familiarity for your team and seamless integration into your operational processes.

Whether for a project, event, or long-term programme, we tailor our service to your needs.

Sectors Using WCCTV's Surveillance Towers

Retail & Supermarkets

WCCTV provides UK-manufactured Body Worn Cameras that help protect retail and supermarket staff, reduce incidents of abuse, and capture secure video evidence.

Security

WCCTV supplies UK-manufactured Body Cameras that help security teams deter aggression, capture vital video evidence and improve safety.

Rail & Transport

WCCTV supplies UK-manufactured Body Cameras to rail operators and contractors to help protect frontline workers.

Local Authorities

WCCTV supplies UK-manufactured body cameras to help address anti-social behaviour, reduce complaints, protect lone workers and improve transparency.

Healthcare & NHS

Body Cameras are protecting frontline workers across the UK's healthcare sector by reducing physical violence and verbal abuse that staff come up against on a daily basis.

Traffic Management

Body Worn Cameras support traffic and highway workers by enhancing their personal safety and reliably capturing high-quality video evidence.

WCCTV's Evidence Management Software

Secure, Simple Video Evidence Management

WCCTV's Evidence Management Software (EMS) offers a fast, secure and intuitive way to manage digital files recorded on our Body Worn Cameras.

Built on a world-leading cloud infrastructure platform, it provides maximum data security, customisation and scalability. Authorised users can securely access, review and manage footage from any location with an internet connection. The platform is packed with features to simplify evidence handling, including:

- **Image redaction tools for GDPR compliance**
- **Full audit trails for every file**
- **Video clipping, annotation, and secure sharing**
- **Utilisation reports for performance insights**

Smart Hub Charging Docks for Body Cameras

The Platform for Smarter Surveillance

WCCTV's Smart Hubs are the fast, secure way to charge body worn cameras and upload footage to our cloud-based Evidence Management Software.

These fully self-contained units handle charging and video transfer in one simple process, keeping your equipment ready for immediate redeployment.

- **Charge multiple devices simultaneously for max efficiency**
- **Rapid charge from 0% to 100% in approximately 3 hours**
- **Automatic, secure video transfer to EMS while charging**
- **Built-in storage ensures uploads complete without delays**

Accessories for WCCTV's Body Worn Cameras

Customise Your Deployment

WCCTV offers a full range of body camera accessories designed to improve usability, comfort, and protection in any working environment.

Whether you need quick-release mounting solutions, ruggedised cases, or extended battery life, we have options to suit every application.

[Learn More](#)

- **Klickfast leather pouches and clip mounts for secure attachment**
- **Magnetic lanyards for quick and flexible positioning**
- **Leather shoulder harnesses for all-day comfort**
- **Breakaway centre chest harnesses**
- **2-way and 8-way docking and charging cradles for convenience**
- **Rugged protective cases**

Why Choose WCCTV for Your Surveillance Solution

UK's Leading Supplier of Redeployable CCTV

WCCTV has been designing and supplying temporary CCTV systems for over 20 years. Every product is developed in-house by our UK-based team and built to meet the real-world demands of public space, construction and infrastructure monitoring.

We're not a reseller or assembler. We design, manufacture and support our systems directly, ensuring every unit delivers reliability, performance and full compliance with industry standards, including NDAA requirements.

Each system includes connectivity, access to Stellifii, and optional service bundles that cover installation, live monitoring, and maintenance.

Our market-leading technology is trusted by over 450 councils, police forces and major infrastructure providers. You're choosing a proven surveillance partner with a track record of innovation, service and results.
