

WCCTV Software

WCCTV products can be accessed by a wide range of software that can be downloaded to a variety of platforms, including iPads, iPhones, Android devices, Windows laptops and desktop PCs. A full suite of integration options is available for control rooms to leverage a powerful and feature-rich WCCTV Software Development Kit. By utilising these software options, both live video and evidential quality recorded footage can be viewed and stored.

Single Camera Software

WCCTV's Single Camera Software is unlicensed and free of charge. It allows you to view live images from a WCCTV system and download recorded footage. It is easily installed onto Windows laptops or desktop PCs. It can also be used to remotely setup and configure all available options on your WCCTV systems.

WCCTV Professional

WCCTV's Professional Software allows the user to simultaneously connect to 21 WCCTV systems at any one time, while the Multi-View System can be used as a standalone control room with up to 64 cameras being used simultaneously. WCCTV also caters for the proliferation of mobile devices, and provides software which will operate on iPhones, iPads, Windows PDAs and Android systems.

WCCTV Event Management Software

WCCTV Event Management software is an ideal tool to monitor alarms generated on WCCTV equipment. This software is ideal for any control room that is managing alarms on remote sites to provide site security. In addition, the software also runs self-diagnostic checks on the WCCTV systems to ensure they are operational 24/7.

WCCTV Software Development Kit

It is possible to integrate WCCTV software seamlessly into a digital control room via the WCCTV SDK. This integration has already been performed by integrators across many operating platforms so please check with WCCTV in the first instance to ensure you benefit from the most rapid integration route.
