

WCCTV Level Crossing Census Solution

Wireless CCTV is a market leading provider of rapidly deployable, portable CCTV and surveillance systems. The systems operate over wireless technologies including 4G and 3G phone networks as well as satellite, Wi-Fi and broadband technologies. This makes the systems ideal for redeployable solutions in temporary, mobile or semi permanent situations.

WCCTV surveillance systems have been developed in conjunction with integrators, government agencies, transportation, rail and utility companies, police forces, housing, construction and commercial organisations.

WCCTV Level Crossing Census Solution

WCCTV's Level Crossing Census solution is a portable, rapid deployment system designed to provide accurate census data (per Network Rail guidance), classification and reporting of level crossing usage on short-term deployments (typically 9 days) or longer if required.

WCCTV will deploy a Network Rail Type Approved CCTV Tower at a level crossing and configure the system to cover the specific area of interest. The client will be provided with remote access / viewing from the tower's camera (if required) via WCCTV's software or mobile apps.

At the end of the 9 day deployment, WCCTV will collect the Tower and either re-deploy to your next location, or return to one of our premises. The system's hard drive with the full 9 days footage will be copied and sent to our industry leading analysis specialist partners who will provide the full video analysis of the 9 days.

A copy of the hard drive will be provided to Network Rail to keep for posterity and transparency purposes should they ever need to verify the data.

We will provide a report to the Network Rail client within 1 week, based on the requirements Network Rail's Level Crossing Census guidance.

For further information on WCCTV's Level Crossing Census Solution please contact our sales offices:-

Features & Benefits

- Accurate census data collection delivered by global market leaders in wireless video transmission and data interrogation
- Rapidly deployable, portable and easy to install. Move from site to site with ease
- Full installation service delivered by WCCTV's PTS trained engineers
- Results delivered within one week in easy to understand tabular format
- Meets Network Rail Guidance on Level Crossing Census
- Fuel cell powered system for fully autonomous deployment
- Fully PADS approved system (PA05/04778)
- Short term deployments - 9 days or as required to provide accurate information
- Cost-effective solution for census data gathering
- Hard disk provided at the end of deployment for transparency of reporting accuracy
- Live access provided to cameras if required
