

Local Authorities: Dudley Council and West Midlands Police

The Challenge

West Midlands Police and Dudley Council needed to ensure the safety of the general public during a demonstration organised by the group 'Britain First' which was to take place around the streets of Dudley.

The group planned to march, then deliver speeches outside the Council offices in the town centre,

requiring local police forces to line the streets to monitor the behaviour both the group and counter demonstrators.

The town centre is equipped with fixed CCTV systems, however these did not cover the planned area of the demonstration.

Local Authorities: Dudley Council and West Midlands Police

The Solution

West Midlands Police and Dudley Council already had a number of WCCTV's 4G Mini Domes which they were able to rapidly redeploy from their usual locations to provide coverage of the route of the demonstration.

WCCTV's flexible Mini Dome system allows the transmission of live and recorded footage via the 4G network, back to any number of mobile devices.

Additionally, West Midlands Police were also provided with constant surveillance of the local area from their control room by using the WCCTV 4G Nano DVR system.

The Quote

"The 4G Mini Domes provided by WCCTV were deployed to areas of the town which were to be impacted by the demonstration that would otherwise not have been covered by our existing CCTV."

Live footage was monitored by our team in the control room, and the clear images provided by the cameras enabled us to instruct the team on the ground accordingly. Overall our experience with WCCTV was very positive and would not hesitate to recommend them for future events."

Dudley Council

The WCCTV 4G Mini Dome

The WCCTV Mini Dome Camera provides the user with complete flexibility and portability. The system can be deployed in any location and is ideal for rapid installation and temporary surveillance applications.

The Dome system has an integrated camera and transmission unit offered as a 'one-box' solution. Users are able to dial in remotely and access live or stored digital footage from the integral hard drive or compact flash card.

The camera itself can be controlled remotely with full pan, tilt and zoom functionality and a 360° field of vision.

Features & Benefits of the WCCTV 4G Mini Dome

- Complete, lightweight integrated unit
- Reportable and rapidly deployable
- Built in self-testing diagnostics
- Remote access to evidential, removable digital recording
- 360° field of vision
- Remote control with full pan, tilt and zoom functionality
- 4G, 3G, GPRS, Wi-Fi and IP connectivity
